Description :

Sharp Container Leak Proof Plastic (Product Code: SLE/CL/16) is a leak-proof, puncture-resistant container made of heavy-duty plastic for collecting and disposing of potentially infectious sharps such as lancets, needles and broken capillaries. It holds 4 to 6 L, stands upright andstable while in use, and closes with a tight-fitting lid so that sharps cannot come back out once itis sealed. The container is non-sterile and is intended to be disposed of as medical waste. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, to laboratory services from basic labs to reference centres that source through a lab consumables supplier in India.

Specifications

Parameter	Detail
Type	Leak-proof, puncture-resistant sharps container
Material	Heavy-duty plastic
Capacity	4 to 6 L
Closure	Tight-fitting lid; sharps cannot come out once closed
Stability	Upright and stable during use
Sterility	Non-sterile
Intended use	Collecting potentially infectious sharps
Recommended disposal	As medical waste

Typical Use

Any bench where finger-prick sampling, venepuncture or capillary work takes place needs a sharps container within arm's reach, so that a used lancet or needle goes straight in without being carried across the room. Blood-collection points, haematology benches and teaching labs running blood-group practicals are typical locations. The heavy-duty plastic resists punctures from needle tips, and the stable base means the container does not tip when a sharp is dropped in with one hand.

Drop sharps in point-first and never push them down or try to recover anything from inside. Do not overfill: close the lid firmly when the container is about three-quarters full, then send the whole container for disposal as medical waste in line with your facility's rules. Pairing it with biohazard bags for soft waste and a supply of gloves keeps waste segregation simple for every user of disposable lab equipment in India.

Supplier

This sharps container reaches laboratories through **Jain Scientific Equipments Private Limited** , a company in Ambala, Haryana, better known by its ScienceLab brand, which sources safety consumables to complement the equipment it manufactures for clinical and educational users. Details are on the company profile.
