Description :

Beaker Plastic (Product Code: SLE/CL/18) is a 250 ml beaker in polypropylene or an equivalent plastic, chosen for clinical laboratories that want a heat-resistant vessel which will not shatter when knocked over. The plastic is chemical and heat-resistant and autoclavable, resistant up to 121 °C, and the beaker has a pouring spout, embossed graduations beginning at 25 ml and a wide hexagonal base for stability. It is used for multiple techniques in clinical labs, from mixing reagents to collecting rinse liquids. The beaker is manufactured by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, and suits buyers comparing options from any lab plastic ware supplier in India.

Specifications

Parameter	Detail
Capacity	250 ml
Material	Polypropylene or equivalent
Resistance	Chemical and heat-resistant plastic
Autoclaving	Autoclavable, resistant up to 121 °C
Graduations	Embossed, beginning at 25 ml
Spout	Spout for easy pouring
Base	Wide hexagonal base
Intended use	Heat-resistant beaker for multiple techniques in clinical laboratories

Typical Use

On a clinical bench the 250 ml beaker is a general-purpose vessel: dissolving weighed salts to make buffers and diluents, holding stain or wash solutions during slide work, collecting waste rinse liquid, or carrying water to top up equipment. Because the plastic is autoclavable to 121 °C, the beaker can be sterilised with other reusable ware, and because it does not shatter it is well suited to student benches where glass breakage is a concern — one reason it is popular as lab equipment for college practicals as well as hospital labs.

The embossed graduations starting at 25 ml give approximate volumes that stay readable after repeated washing; for accurate measurement transfer liquid to a measuring cylinder or volumetric ware. The hexagonal base resists rolling and tipping, and the spout gives a controlled pour. Wash with warm water and mild detergent, avoid abrasive pads that scratch the surface, and check compatibility before holding strong solvents for long periods.

Manufacturer

The Beaker Plastic is part of the ScienceLab range manufactured by **Jain Scientific Equipments Private Limited**, an Ambala, Haryana company that serves clinical, school and college laboratories. For vendor registration, the company's GSTIN is 06AAFCJ8618A1ZT and its Legal profile
