Product Name :

Lab Coat Work

Product Code :

SLE/CL/22

Description :

Lab Coat Work (Product Code: SLE/CL/22) is a standard white laboratory coat in non-shrink cotton, worn for personal protection during work in the laboratory. It has long sleeves, a notched lapel collar, front button closure, a left breast pocket and left and right lower side pockets, and it measures approximately 110 cm in length. This listing is for size small, supplied as a singleplastic-wrapped coat. Staff in laboratory services from basic labs to reference centres wear it overtheir clothes at the bench. It is manufactured by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, for institutions looking for a reliable lab coat supplier in India.

Pockets	Left breast pocket; left and right lower side pockets
Colour	White
Length	Approximately 110 cm
Size	Small
Supplied as	Pack of 1 plastic-wrapped coat
Intended use	Personal protection during work in the laboratory

Typical Use

A cotton lab coat is the first layer of protection between everyday clothing and whatever happens on the bench — drips of stain, reagent splashes, blood specimens or dust from powders. The long sleeves cover the forearms while pipetting and handling tubes, and the length of about 110 cm protects clothing down to the knees when seated or standing. White fabric shows contamination quickly, which reminds the wearer to change and launder the coat before it spreads to other areas, a habit worth building in students using lab equipment for college practicals as well as in hospital staff.

Wear the coat fully buttoned, keep sleeves down, and take it off before leaving the lab for canteens, offices or libraries. Pens, markers and small notebooks fit the breast pocket, while the lower side pockets hold labels or tissues — but not sharps or open tubes. Because the cotton is non-shrink (less than 5%), the coat keeps its fit after regular laundering; wash coats separately from household clothes, and send any coat contaminated with infectious material for decontamination first.
