Description :

Series Binoculars (Product Code: SLE/M/49) are rubber-covered, waterproof binoculars usedfor bird watching, wildlife surveys and environmental science field work by schools, colleges and outdoor education teams. They come in a choice of 8x or 10x magnification, are fogproof and nitrogen-purged for use in all kinds of weather, and can be adapted to a tripod. They are manufactured by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India.

Key Details

Parameter	Detail
Magnification	Choice of 8x or 10x
Body	Covered with rubber for rough handling and tough conditions
Weather protection	Waterproof, fogproof and nitrogen-purged
Focusing	Large focus knobs for easy, precise focusing
Eyecups	Twist-up, for quick eye-relief adjustment to obtain the full field of view
Tripod use	Tripod adaptable
Design	Lightweight, ergonomic
Straps	Comfortable straps pre-attached
Product code	SLE/M/49
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Are Waterproof Binoculars Used For?

Weather-sealed binoculars keep field work going when conditions are wet or humid: monsoon bird counts, wetland and riverbank surveys, coastal trips and dawn observations when dew settles on everything. Nitrogen purging stops the inside of the optics from misting when the binoculars move from a cool room into warm, damp air, and the rubber covering protects them when they are passed between students.

Choose 8x for a wider, steadier view of birds in flight and for younger users; choose 10x to pick out markings on distant subjects. For long watches of a nest, a waterhole or a study plot, fit the binoculars to a tripod so the image stays still. Set the twist-up eyecups for each user and use the large focus knob to sharpen the view.

What to Specify When Ordering

- Magnification: 8x, 10x or a mix of both for your group
- Number of pairs needed
- Whether you also need a tripod and adapter (not listed as included)
- Delivery location for the quotation
