Description :

200 Wp Solar Power System, Complete (Product Code: SLE/CME/03) is a standard, heavy-duty solar power package used to give permanent installations such as a radio room or remote repeater site direct or back-up electricity. It combines four 50W solar modules, two maintenance-free 12V batteries in a battery box, a charge controller, a metal support structure and the installation material. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**,Ambala, India, a laboratory equipment supplier in India that also sources off-grid power systems.

Specifications

Parameter	Detail
Solar modules	4 x 50W solar electric modules (200 Wp), mounted electricallyin parallel
Batteries	2 x maintenance-free 12V/120-125Ah, connected in parallel
Battery housing	Battery box, with the charge regulator mounted on its side
Charge controller	10V/10A (as listed; confirm the rating in your quotation)
Support structure	Heavy-duty metal (aluminium) support structure
Installation material	All required cabling, nails and plugs
Typical applications	Direct or back-up power for a complete radio room or a remote repeater site
Installation requirement	Must be installed by qualified technical staff
Product code	SLE/CME/03
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the 200 Wp Solar Power System Used For?

The system is intended for permanent installations that need their own electricity, typically a complete radio room or a remote repeater site. The four panels are wired in parallel and fixed to the aluminium support structure, heavy-duty cable runs from them to the charge regulator on the side of the battery box, and the two batteries inside the box are connected in parallel to the regulator.

Mount the panels on a rooftop or another secure location with a direct view of the sun, and adjust the support elevation for the most solar power across the day. The aluminium support must be properly grounded, and the panels should be cleaned with water and a soft brush at regular intervals. Installation must be done by qualified technical staff, because incorrect installation may cause mechanical failure, electrical damage, poor performance and safety risks.

What to Specify When Ordering

- The model: 200 Wp Solar Power System, Complete (SLE/CME/03).
