Product Name :

Map software for GPS receiver

Product Code :

SLE/CME/04

Email : sales@scilabexport.com
Phone: +91-7082934803

Description :

Map software for GPS receiver (Product Code: SLE/CME/04) is a CD-ROM of worldwide base-map software used to load maps onto a handheld GPS receiver for navigation and fieldwork. It covers coastlines, nautical navigation aids, political boundaries, cities, main roads, rivers, lakes and railways, and adds trip and waypoint management functions. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India, a laboratory equipment supplier in India that also equips field and communication teams.

Key Details

Parameter	Detail
Format	CD-ROM
Coverage	Worldwide, with base-map level detail
Coastal and marine features	Coastline detail including many offshore islands; worldwide nautical navigation aids
Land features	Political boundaries, cities, towns, major motorways and/or interstates, principal highways, lakes, major streams and rivers, urban areas and railroads
Functions	Trip and waypoint management
Installation	CD-ROM inserted into a PC; maps uploaded to the GPS receiverusing a microSD card or the PC USB port
Product code	SLE/CME/04
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the GPS Map Software Used For?

The software puts a worldwide base map on a handheld GPS receiver, so field staff can see their position in relation to coastlines, towns, main roads, rivers, railways and boundaries. Teams working on outreach, surveys, logistics or field studies use its trip and waypoint management to plan journeys and return to recorded locations.

To install it, insert the CD-ROM into a PC and upload the map software to the GPS receiver through a microSD card or the PC's USB port. The detail is described at base-map level, so it suits regional navigation and orientation rather than street-by-street guidance, while coastal users also get the worldwide nautical navigation aids.

What to Specify When Ordering

- The product: Map software for GPS receiver (SLE/CME/04).
- The make and model of the GPS receiver the maps will be loaded onto.
- Whether you will upload by microSD card or through a PC USB port.
- The number of copies required and the delivery location.
