Description :

Container Sample 50 ml (Product Code: SLE/CL/32) is a screw-capped specimen container in colourless plastic with a capacity of approximately 50 ml, suitable for a wide range of clinical specimens. It is non-sterile and intended as a single-use disposable, so each patient samplegoes into a fresh container that is discarded after testing. Outpatient collection points, hospital laboratories and diagnostic centres use containers like this every day, and it is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, as part of its disposable lab equipment for India and overseas buyers.

Specifications

Parameter	Detail
Material	Colourless plastic
Type	Sample container suitable for a wide range of clinical specimens
Closure	Screw cap
Sterility	Non-sterile
Use	Single-use disposable
Capacity	Approximately 50 ml

Typical Use

A general specimen container of this size is handed to patients for routine urine examination, and is also used for sputum, other body fluids and small samples that are sent to the laboratory for non-culture testing. The clear plastic lets staff check the sample volume and appearance before the cap is removed, and the screw cap keeps the contents closed on the way from the collection room to the bench. Because the container is non-sterile, tests that require a sterile sample, such as microbiological culture, should use a sterile container instead.

Label the body of the container rather than the cap, since caps can be mixed up once removed. Tighten the cap fully, keep containers upright, and send them in a secondary bag or transport box. After testing, dispose of the container and any remaining sample as clinical waste. Many laboratories keep a steady stock of these containers, ordering them with gloves, labels and pipettes from one laboratory equipment supplier in India.

Supplier

Jain Scientific Equipments Private Limited runs the ScienceLab brand from Ambala, Haryana. Alongside the laboratory apparatus it manufactures, the company supplies collection consumables like this container for hospitals, diagnostic centres and colleges.
