Product Name :

Transfer Pipette 3ml

Product Code :

SLE/CL/35

Email : sales@scilabexport.com
Phone: +91-7082934803

Description :

Transfer Pipette 3ml (Product Code: SLE/CL/35) is a single-use, non-sterile transfer pipette with a capacity of 3.0ml, a fine tip and an integrated flexible suction bulb, so liquid can be drawn up and released with one hand and no separate filler. Embossed graduations, the smallest step being 0.5ml, give a quick visual guide to the volume held. Clinical laboratories use it to move serum, urine and reagents between containers, and teaching laboratories use it wherever students need a safe alternative to mouth pipetting. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, a lab consumables supplier in India for hospitals, colleges and schools.

Specifications

Parameter	Detail
Type	Transfer pipette
Capacity	3.0ml
Tip	Fine tip
Graduation	Embossed; minimal graduation 0.5ml
Bulb	Integrated flexible suction bulb
Sterility	Non-sterile
Use	Single-use disposable

Typical Use

After a blood sample has been centrifuged, a transfer pipette is the quickest way to lift the serum or plasma off the cells and into a labelled tube. The fine tip also makes it easy to add reagents drop by drop, to top up a tube to a mark, or to move a portion of a urine sample into a centrifuge tube for sediment examination. Because a fresh pipette is used for each sample, there is no washing and no risk of carrying material from one patient to the next.

Squeeze the bulb before the tip enters the liquid, then release slowly to draw up the sample; keep the pipette tip-down so liquid does not run into the bulb. The embossed marks are meant as a guide, so use a calibrated pipettor when an exact volume is required. Colleges choosing lab equipment for college practicals in India often stock these pipettes in quantity because they suit large classes and remove the need for mouth pipetting.

Supplier

Jain Scientific Equipments Private Limited, which trades as ScienceLab from Ambala, Haryana, supplies disposable items such as this pipette together with the laboratory equipment it builds for clinical and educational users. That lets a laboratory source its routine plastics and its instruments from the same place. Read more on the company profile.
