Description :

Tourniquet With Buckle (Product Code: SLE/CL/49) is a reusable, washable venipuncture tourniquet made of strong elastic tissue, approximately 2cm wide, with a snap-lock buckle of ABS or an equivalent polymer. Wrapped around the upper arm during blood sample collection, it briefly slows venous return so veins stand out and are easier to puncture; the buckle then lets the phlebotomist release pressure with one quick press. It is used at facilities of every level, from health posts to hospital laboratories and nursing training rooms, and is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, a lab equipment manufacturer in India based in Ambala.

Specifications

Parameter	Detail
Type	Venipuncture tourniquet with buckle
Strap material	Strong, elastic tissue
Buckle	Snap-lock, made of ABS or equivalent polymer
Width	Approximately 2cm
Length	45cm to 75cm
Reuse	Reusable, washable
Application	Blood sample collection, at all facilities

Typical Use

Place the strap around the arm roughly a hand’s width above the intended puncture site, pull it snug and click the buckle closed. Ask the patient to make a loose fist, locate the vein, insert the needle and connect the collection tube, then press the buckle to release the strap as soon as blood starts to flow. Leaving a tourniquet on for more than about a minute can alter some test results and cause discomfort, so it should be released before the needle is withdrawn.

Because the strap is washable, clean and disinfect it between patients in line with your facility’s infection-control policy, and remove it from service if the elastic becomes stretched or the buckle stops locking firmly. Nursing and paramedical institutes that buy lab equipment for college training in India find a buckle tourniquet easier for students to handle than a plain rubber strip.

Manufacturer

Jain Scientific Equipments Private Limited, which trades as ScienceLab, manufactures this buckle tourniquet in Ambala, Haryana, and also produces a broad range of laboratory and training apparatus for customers in India and abroad. The company profile gives more detail.
