Product Name :

Slide Drying Rack

Product Code :

SLE/CL/53

Description :

Slide Drying Rack (Product Code: SLE/CL/53) is a self-supporting stand that holds freshly stained microscopy slides upright while they air-dry, so smears are not smudged, stuck together or left lying in pooled stain before examination. Pathology benches, hospital laboratories and college microbiology practicals use it whenever smears are stained in batches, and it is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India, as a practical part of any microbiology lab setup in India.

Specifications

Parameter	Detail
Material	Heat-stable plastic (plexiglass)
Design	Self-supporting rack; sturdy base for optimal stability
Capacity	12 microscopy slides held in a vertical position
Positions	12 numbered positions
Drying surface	Slides stand vertically on replaceable blotting paper
Intended for	Drying coloured (stained) microscopy slides

Typical Use

Once a Gram, Giemsa or Ziehl-Neelsen stain has been rinsed off, each slide is stood on its edge in one of the numbered slots with all smears facing the same way. Rinse water and residual stain run down onto the blotting paper at the base instead of drying as a film over the cells, and the upright position lets air reach both faces of the glass. Because every slot carries a number, the technician can note which patient or student sample sits in which position and then read the slides in that order under the microscope.

Change the blotting paper once it is coloured or saturated so that dye cannot wick back onto the slide edges, and wipe the plexiglass with a damp cloth and a mild detergent after each session. The rack is equally at home in a teaching lab and on a small diagnostic bench, making it useful microbiology lab equipment in India wherever slides are stained several at a time.

Manufacturer

This rack comes from Jain Scientific Equipments Private Limited, the Ambala, Haryana company that trades under the ScienceLab name and produces clinical, biology and general laboratory items for schools, colleges and diagnostic laboratories. You can learn more about the business on our company profile page.
