Description :

Test Tube Rack SS (Product Code: SLE/CL/56) is a stainless steel rack with 24 openings sized for 18 mm test tubes, keeping specimen, reagent and reaction tubes upright and in a fixed order on the bench. It is used mainly in secondary, tertiary and reference clinical laboratories, and teaching labs that want a metal test tube rack for school practicals in India choose it too. Manufacturer: **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India.

Specifications

Parameter	Detail
Capacity	24 test tubes
Material	Stainless steel
Tube size	For test tubes of 18 mm diameter
Hole diameter	19 mm
Typical setting	Secondary, tertiary and reference facilities

Typical Use

In a busy biochemistry or serology section, a batch of patient samples is loaded row by row so that each tube's position matches the worksheet; reagents are then added across the rack in the same order, and the whole set can be carried to the centrifuge or reading station without tubes falling over. The 19 mm holes give an 18 mm tube a snug but easy fit, so tubes can be lifted out one-handed while the rest stay in place.

Stainless steel can be wiped with the disinfectants normally used on clinical benches; if a hypochlorite solution is used, rinse the rack with water afterwards and dry it to keep the surface bright. For school and college labs, a steel rack like this is sturdy laboratory equipment for school use in India, where racks are handled by many students every day.

Manufacturer

ScienceLab, the trading name of Jain Scientific Equipments Private Limited, fabricates racks, stands and bench accessories for clinical and educational laboratories from its base in Ambala, Haryana. Our company profile gives an overview of the organisation.

Related Clinical Laboratory Equipment

Equipment that works alongside this rack in routine tube handling:

- Vortex Test Tube — mixes the contents of a tube taken from the rack before it is returned.
- Test Tube Holder — grips a single tube when it has to be warmed or handled away from the rack.
- Brush Test Tube — cleans reusable glass tubes between runs.
- Water Bath Stainless Steel Test Tube Rack — for incubating tubes inside a water bath.
- Test Tube Rack, Polypropylene — a plastic alternative for general teaching benches
