Product Name :

Synthetic Leather, Pac/3

Product Code :

SLE/EDS/038

Description :

Synthetic Leather, Pac/3 (Product Code: SLE/EDS/038) is a pack of footbags – small filled kick balls with a PU synthetic-leather cover – used for foot-eye coordination, balance and keep-it-up games in school physical education. Each footbag measures 53 mm across, is sewn from 6 panels and carries a loose metal filling, so it drops back down instead of bouncing away. Thepack is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India.

Diameter	53 mm
Pack	Pac/3 (pack of 3)
Product code	SLE/EDS/038
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Footbag Used For?

A footbag is kept in the air with the feet, knees and thighs – never the hands. Pupils can count their own consecutive touches, pass the bag around a small circle, or play a relay in which each child must control it before passing it on. Because it is filled rather than inflated, it stays where it lands, which makes early practice less frustrating than with a bouncing ball.

The activity trains balance on one leg, timing, concentration and control of both feet, and it needs very little space, so it works in a hall, a corridor area or a corner of the playground. Beginners can start with drop, kick once and catch, then build up to two or three touches. Having 3 bags in one pack lets a teacher run several small groups at the same time.

Supplier

ScienceLab is the trading name of Jain Scientific Equipments Private Limited, an Ambala-based company that supplies this footbag pack together with balls, ropes and group-play equipment for school sports rooms. Orders for a single pack, a class set or a larger programme are handled by the same team, and you can learn more about the company on our company profile page.

Related Physical Education Equipment
