Description :

Bioviewer Strips Adaptation (Product Code: SLE/BL/10) is a set of 8 images in 35 mm format, photographed through a microscope, used as a visual learning aid for the adaptation topic in biology lessons. Arrows and callouts on the images guide students to the features being studied, and a detailed lesson plan accompanies the set. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, a biology lab equipment supplier in India, as part of its biology teaching aids.

Key Details

Parameter	Detail
Images in set	8
Image format	35 mm
Image source	Photographed through a microscope
Student guidance	Arrows and callouts locating the important features
Teacher material	Detailed lesson plan designed to stimulate, inform and question students
Title	Adaptation
Type	Learning aid
Product code	SLE/BL/10
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Are Bioviewer Strips Used For?

Bioviewer strips bring microscope-level images into lessons where there are not enough microscopes or prepared slides for every student, or where students need to know what to look for before using a microscope themselves. Because each of the 8 images carries arrows and callouts, a student can find the feature under discussion without the teacher checking every eyepiece.

The lesson plan gives the session a structure: introduce the topic, let students study each image in turn, then use the plan's questions to check understanding. The strips also work for revision and for comparing photographed features with students' own slide observations, making them a flexible item among biology teaching aids.

Supplier

Jain Scientific Equipments Private Limited, trading as ScienceLab in Ambala, Haryana, supplies these Bioviewer strips as a learning aid alongside prepared slides and microscopes. Schools, colleges, dealers and importers in India and international markets can combine them with other biology resources in one enquiry. Read about the company on the ScienceLab profile.
