Description :

Red Pen Ball Point (Product Code: SLE/S/05) is a general-purpose red ballpoint pen used by teachers and students for marking, correcting and highlighting written work. Teachers value its 1 mm ball, tropical ink and minimum writing distance of 2,000 metres from about 0.30–0.37 g of ink. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India, a lab consumables supplier in India whose stationery range includes pens.

Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is a Red Ballpoint Pen Used For?

Red is the traditional colour for marking and correction, so red pens are a staple for teachers checking homework, test papers and practical notebooks. Students use them to underline headings, mark key terms, draw margins and note corrections in their own work, which keeps revision notes easy to scan.

The 1 mm ball lays down a bold line that stands out against blue or black writing, and tropical ink is specified for use in hot climates. With a minimum writing distance of 2,000 metres per pen, a single pen lasts through a large amount of marking.

Supplier

Jain Scientific Equipments Private Limited supplies the Red Pen Ball Point under its ScienceLab name from Ambala, Haryana, as a sourced stationery item for schools, colleges and offices. It can be quoted on its own or with the blue and black versions for India and international markets. Read about the company on our profile page.
