Description :

Inflating-Kit for Balls (Product Code: SLE/PE/08) is a hand pump kit used to inflate new balls and re-inflate the footballs, basketballs and volleyballs kept in a school physical education store. The kit pairs 1 hand pump – tube approx. 22 mm in diameter and 210–250 mm long, in an enamelled metal or plastic casing with a wooden or plastic handle – with 2 non-return inflating needles. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India.

Specifications

Parameter	Detail
Kit contents	1 x hand pump; 2 non-return inflating needles
Pump tube diameter	Approx. 22 mm (±5% variation)
Pump tube length	Minimum 210 mm, maximum 250 mm
Casing	Enamelled metal or plastic
Handle	Wooden or plastic
Suitable for	Footballs, basketballs and volleyballs
Use	Inflation of new balls and re-inflation of most balls used for physical education and recreation
Estimated weight	83 g
Estimated volume	0.354 dm^3
Product code	SLE/PE/08
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Ball Inflating Kit Used For?

Many sports balls are shipped flat to save space, and all of them slowly lose pressure with use. This kit lets a PE teacher bring a new ball up to playing pressure on the day it arrives and keep the whole ball store topped up, so lessons are not spoiled by soft footballs or basketballs that will not bounce.

Fit a needle to the pump, wet its tip with a drop of water, and push it straight into the ball's valve without twisting. Pump with steady, full strokes, check the pressure recommended on the ball, and stop before it becomes over-hard. Remove the needle straight out and keep the spare needle in a safe place, as needles are small and easily lost.

What to Specify When Ordering

- The number of kits – for example one per PE store or per sports ground.
- Any preference between an enamelled metal and a plastic pump casing.
- Any preference between a wooden and a plastic handle.
- Which balls you want quoted with the kit, so everything arrives together.
