Description :

Basketball, Professional Size (Product Code: SLE/PE/012) is a full-size orange rubber basketball used for dribbling, passing, shooting and match play in school and college physical education. It has a circumference of 75–78 cm and weighs 600–650 g, with an 8-panel rubber casing over a seamless, nylon-wound butyl bladder, and it is suitable for all types of playgrounds. Delivered deflated with two non-return inflating needles, it is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India.

Specifications

Parameter	Detail
Size	Professional/official size
Circumference	75–78 cm
Ball weight	600–650 g
Outer casing	Rubber, 8 panels
Bladder	Butyl, nylon wound, seamless
Valve	Non-return valve
Colour	Orange
Playing surface	Suitable for all types of playgrounds
Supplied	Deflated, with two non-return inflating needles
Estimated weight / volume (catalogue figures)	0.730 kg / 2.496 dm^3
Product code	SLE/PE/012
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Basketball Used For?

In a PE lesson the basketball is used for stationary and moving dribbling drills, chest and bounce passes, lay-ups and set shots, followed by small-sided or full-court games. School teams use the same ball for practice and inter-house or inter-school matches, so pupils train with the full-size ball they will play with.

The rubber casing is made for outdoor courts and playgrounds, where it copes better with rough surfaces than an indoor-only ball, and the nylon-wound bladder helps it keep a round shape and a consistent bounce. Inflate it to the pressure printed on the ball, test the bounce before the lesson, and store the balls in a rack or bag rather than on a damp floor.
