Description :

Single Bowl Stand On Castors (Product Code: SLE/HF/09) is a movable, fixed-height stand that holds one bowl in a ring at the top of a stainless steel column, on a heavy five-castor base. Theatre and ward staff wheel it beside the patient to keep a bowl of antiseptic, saline or irrigation fluid at working height, or to receive used swabs and instruments. The column, ring and bowl are austenitic stainless steel 18/10 and the base is a single moulded unit. It is manufactured by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, a laboratory equipment supplier in India that also makes hospital furniture.

Specifications

Parameter	Detail
Type	Movable, fixed-height stand to hold a single bowl
Bowl capacity	3–6 L
Bowl holder	Ring structure at the top of the column in which the matching bowl mounts securely; diameter 30 cm
Support column	3–3.2 cm (outside, across), 1.0–1.5 mm thickness; lower enddeep and securely fixed into the carriage base
Column, ring and bowl material	Austenitic stainless steel 18/10
Carriage base	Heavy, single moulded unit in polypropylene or nylon; diameter 58–60 cm
Castors	5 swivel castors, twin-wheel, solid type, non-hooded for easy maintenance; 4.5–5 × 5 cm (w × diameter)
Castor materials	Wheels, bearings and frame/bracket in polypropylene or nylon; castor fixation into base in stainless steel
Stand height	100–105 cm
Carrying capacity	10–11 kg
Corrosion resistance	High (tropical environment)

Typical Use

During surgery or a dressing procedure, the circulating nurse fills the bowl and rolls the stand to the edge of the sterile field so the operator can reach solution without leaning across instrument trays. On wards it serves as a hand-wash or soak basin at the bedside, and in labour rooms it can hold warm water or receive the placenta for inspection. The five-castor base spreads the load of a full bowl, so the stand stays upright when nudged, and the twin-wheel castors roll easily on theatre floors.

Because every part that touches fluid is 18/10 stainless steel, the bowl and ring can be scrubbed and sterilised along with other metal hollowware. Paramedical and nursing institutes ordering from
