Description :

Double Door Medicine Cabinet (Product Code: SLE/HF/10) is a tall, lockable steel cabinet for storing medicines on wards, in dispensaries and in hospital pharmacies. Its plain, solid doors block the view of contents, and inside it has 4 height-adjustable shelves plus 2 built-in controlled medicines compartments, each with its own key lock, so scheduled drugs can be kept under double security. Hospital stores and teaching institutions that buy pharmacy lab equipment inIndia use it wherever medicines must be kept secure and organised. It is manufactured by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala.

Specifications

Parameter	Detail
Type	Medicine storage cabinet, double door
Main doors	Plain epoxy coated plate steel, triple hinged, lockable with key; two-point lock sliding into the frame at top and base; opening angle at least 180 degree
Controlled medicines compartments	2 built-in, separately key-lockable; door double hinged with one-point lock sliding into the side of the frame; 31.5–33 × 29–33 × 27 cm (l × w × h)
Shelves	4, height adjustable on reinforced internal fixtures; carrying capacity 25 kg each
Keys	Both keys unique to each cabinet; key-bow folds away from the key-blade to avoid breakage in the lock
Handles	Recessed finger grip-hold along the full length of each door, leaving the front flat
Side panels	Plain, blocking view of cabinet contents
Supports	4 sturdy supports with height adjustable nylon feet; clearance underneath 10 cm for cleaning
Materials	Frame, panels, base, top, shelves, doors and compartments in epoxy coated plate steel; high resistance to corrosion (tropical environment)
Sheet thickness	1.0–1.2 mm (frame, drawer, door and panels)
Overall size	80 × 40 × 180–190 cm (l × w × h)

Typical Use

On a ward, the nurse in charge keeps routine tablets, injectables and IV fluids on the adjustable shelves, while narcotics and other controlled medicines go in the two inner compartments, each locked separately from the main doors. This arrangement supports a clear key-holding routine: the main door key for general access and separate compartment keys held by the responsible officer. Solid doors keep medicines out of direct light and away from casual view in patient areas.
