Description :

Bedside Cabinet Standard (Product Code: SLE/HF/12) is a movable patient bedside locker with a key-lockable drawer at the top and a door-closed storage compartment with one fixed shelf below. It rolls on 4 swivel castors, two of them braked, and a side rail handle lets staff reposition it next to the bed when cleaning or when a patient is moved. Wards, private rooms and recovery areas use it to keep personal belongings, water and daily items within reach. It is manufacturedby **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, a lab equipment manufacturer in India with a dedicated hospital furniture range.

Specifications

Parameter	Detail
Type	Movable basic patient bedside cabinet
Upper part	Drawer, lockable with key
Lower part	Storage compartment with one fixed shelf, closed with door; door opening angle 120–150 degree
Key	Unique to each cabinet; key-bow folds away from the key-blade to avoid breakage in the lock
Handles	Recessed finger grip-hold on drawer and door, leaving the front flat; oneside rail handle for repositioning
Top	Smooth finish for easy cleaning
Castors	4 swivel castors, two with total-lock brake (wheel and rotational lock) mounted on the push-bar handle side; single or double wheels, mould-on type, non-hooded; nylon frame/bracket; 2–4.5 × 5–7.5 cm (w × diameter)
Materials	Frame, side panels, base, top, door and shelf in epoxy coated plate steel; high resistance to corrosion (tropical environment)
Sheet thickness	1–1.2 mm (frame, drawer, door and panels)
Overall size	40–43 × 40–43 × 79–86 cm (l × w × h)
Carrying capacity	30–35 kg

Typical Use

Each patient gets one cabinet beside the bed: valuables, phone and documents go in the locked drawer, while clothes, toiletries and spare linen sit on the shelf behind the door. The flat top holds a water jug, glasses and personal items within arm’s reach of the bed. When the floor is mopped or the bed is moved, staff release the two brakes and pull the cabinet by its side rail handle, then lock the brakes again so it cannot drift if the patient leans on it.

Wipe the smooth top and flat front with disinfectant at discharge before the next patient is admitted. Nursing schools that equip practice wards through a TVET lab equipment manufacturer in Ind
