Description :

Soiled Linen Trolley (Product Code: SLE/HF/13) is a wheeled frame that holds a removable, washable canvas bag for collecting used and soiled linen and moving it across a hospital to the laundry. The open ring at the top has no lid, so sheets and gowns can be dropped straight in during bed changes, and the bag closes with a strong draw string for transport. Wards, theatres, labour rooms and housekeeping departments use it every day. It is manufactured by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, whose hospital furniture is regularly ordered by public facilities through a government lab equipment supplier or direct.

Specifications

Parameter	Detail
Type	Trolley holding a bag for collection and transportation of soiled linen across a hospital facility
Bag holder	Upper ring structure, without lid, accommodating a removable linen bag; connected to the carriage base by two supports
Linen bag	Washable canvas, woven nylon, with strong draw string; capacity 100 L
Carriage	Heavy, on 4 swivel castors, two with brake
Castors	Single wheel, mould-on type, non-hooded for easy maintenance; steel frame/bracket; 2–2.3 × 7.5 cm (w × diameter)
Brake	Total-lock type (wheel and rotational lock)
Frame	Epoxy coated tubular steel, 3.0–3.3 cm (outside, across), 1.35–1.65 mm thickness; high resistance to corrosion (tropical environment)
Overall size	50 × 90 cm (diameter × h)
Carrying capacity	50 kg

Typical Use

During morning bed-making, a housekeeper or nurse parks the trolley at the foot of each bed, locks the brakes and places stripped sheets, pillow covers and gowns directly into the open bag, keeping soiled items off the floor and away from clean linen. When the bag is full, the draw string is pulled closed and the whole bag is lifted out and sent to the laundry, and a fresh bag is fitted to the ring. Separating soiled linen at the point of use in this way is a basic infection-control step on every ward.

The canvas bag can be washed with the linen it carried, and the coated frame is wiped with disinfectant. Hospitals drawing up laboratory equipment tenders in India alongside housekeeping items often specify one trolley per ward, with extra bags so a clean one is always ready.
