Description :

Dressing Trolley SS 2 Trays (Product Code: SLE/HF/22) is a stainless steel ward trolley withtwo flat shelves edged by guard rails and a push-bar handle, built to carry dressing packs, lotions, bowls and instruments from bed to bed. Nurses on surgical and general wards, outpatient dressing rooms and nursing training labs rely on it for daily wound-care rounds. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, a scientific instruments manufacturer in India with a stainless steel hospital furniture line.

Specifications

Parameter	Detail
Type	Dressing trolley with two flat, non-removable shelves
Guard rails	On top and bottom shelves, along one length and both widths
Shelf finish	Smooth, for easy cleaning; 1.35–1.5 mm thickness
Handle	Push-bar handle on one short side
Frame and trays	Austenitic stainless steel 18/10; frame 2.8–3 cm (outside, across), 1.5 mm thickness
Bracing	Transfer bars connect the lower distal portions of all 4 legs
Castors	Heavy carriage on 4 swivel castors, 2 with total-lock brake (wheel and rotational lock), both at the push-bar handle side
Castor construction	Single mold-on wheel, non-hooded for easy maintenance; sealed bearings in swivel and wheel; ball-bearing swivel; frame/bracket steel or nylon
Castor wheel size	2.3–3 x 10 cm (w x diameter)
Protection	Bumpers at all four corners
Overall size	81–99 x 50–60 x 90–110 cm
Carrying capacity	100–120 kg
Environment	High resistance to corrosion (tropical environment)

Typical Use

A dressing round usually starts at the clean utility room: sterile packs and clean supplies go on the top shelf, while the bottom shelf takes lotions, spare gauze and a container for used items. The guard rails keep bowls and bottles from sliding off as the trolley is pushed along the ward by its handle, and the corner bumpers protect door frames and bed ends. At each bed the nurse applies the two brakes at the handle end so the trolley stays put while the wound is dressed.

Nursing schools use the same trolley to teach aseptic set-up and the order of a dressing procedure. Wash both shelves with detergent after the round, disinfect them, and dry fully — as with a on steel
