Description :

Clay, Modelling, Assorted Color (Product Code: SLE/CS/026) is a box of soft, brightly coloured modelling clay for shaping, sculpting and model-making in nursery, primary and middle-school classrooms. Each box contains between 6 and 8 sticks with a combined weight of 500g, and the clay is described as non-toxic. Teachers use it for creative play, fine-motor practice and quick three-dimensional models in science and geography lessons. The product is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India.

Specifications

Parameter	Detail
Contents	Minimum 6, maximum 8 sticks per box
Total clay weight	500g per box
Colours	Bright, assorted colours
Safety	Non-toxic
Inner packing	Neutral film wrap, in easily separable blocks
Outer packing	Over-packed in the supplier's own packaging
Estimated weight (as listed)	0.550 kg
Estimated volume (as listed)	0.387 cdm (cubic decimetres)

Typical Use

Young learners roll, pinch and flatten the sticks to build hand strength and coordination, while older students use the same clay to form landforms, layered models of the Earth, simple plant and animal cell models or molecules for a classroom display. Because the blocks separate easily, a teacher can split one box among a small group so that each child works with a different colour. It fits naturally into a hands-on science kit for primary school or a science model kit for a school project, where a quick physical model helps students explain an idea in their own words.

Work on a wipe-clean surface or a sheet of paper, and keep each colour separate if you want the shades to stay bright; kneading different colours together blends them permanently. After the lesson, press the pieces back into blocks and rewrap them in their film so they stay clean and ready for the next class.

Supplier

ScienceLab, the trading name of Jain Scientific Equipments Private Limited in Ambala, Haryana, supplies this modelling clay as part of the classroom materials it offers next to its own science apparatus. Schools and education programmes can therefore combine art supplies and laboratory items in one enquiry. Read more about the company on its profile page.
