Description :

Beads, Wood (Product Code: SLE/CS/027) is a threading set of large wooden beads with ten laces, designed for children aged 3-6 years in nursery, kindergarten and early primary classes. The beads are not less than 35mm in diameter and come in assorted colours and shapes, so one set supports threading, pattern-making, colour sorting and early counting. Made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, the set is a practical addition to any preschool kit in India or overseas early-years classroom.

Specifications

Parameter	Detail
Bead material	Wood
Bead size	Not less than 35mm in diameter
Threading hole	Approximately 6 mm diameter in each bead
Colours	Assorted, for example red, green, blue, yellow and orange
Shapes	Assorted, for example spheres, cubes, cylinders, ovals and barrels
Laces	Ten laces, approximately 50cm long, securely tipped or heat-welded at each end; one or varied colours; sized to pass easily through the bead holes
Finish	Smooth, secure and non-toxic material and finish for beads and laces
Intended users	Children aged 3-6 years, for safe and continued use
Storage	Sturdy plastic container with a secure lid

Typical Use

Threading large beads onto a tipped lace trains the pincer grip and hand-eye coordination that children later need for writing. Teachers also use the set for pattern cards (red-blue-red-blue), sorting by shape or colour, counting beads onto a lace, and comparing lengths of finished strings. With ten laces in the container, up to ten children can thread at the same time in a small-group corner, making the set a sensible part of a KG science activity kit in India where observation, sorting and classification are introduced.

Before each session, check that lace tips are intact so the ends pass easily through the holes. Wipe the beads with a slightly damp cloth if they get dirty and let them dry completely before closing the lid, as wood should not be soaked. Store everything back in the lidded container so no beads or laces go missing between lessons.

Manufacturer

The bead set comes from Jain Scientific Equipments Private Limited, which trades as ScienceLab and is based in Ambala, Haryana. The company, incorporated under CIN U293 Saha gives
