Description :

Cubes, Wood or Plast., Colored (Product Code: SLE/CS/028) is a set of 100 plain coloured wooden cubes, each approximately 25 mm (1") along an edge, used as play and counting material in early-years and primary classrooms. The cubes have a smooth, non-toxic, un-patterned finish in red, blue, green and yellow, which keeps them simple enough for free play yet ordered enough for structured maths tasks. The set is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, and suits schools building mathematics lab kits in India and abroad.

Specifications

Parameter	Detail
Type	Blocks: assorted coloured cubes
Material (as specified)	Wood
Cube size	Approx. 25 mm (1")
Quantity	Set of 100 cubes
Colours	Red, blue, green, yellow
Finish	Smooth, non-toxic, un-patterned
Intended use	Play material
Estimated weight (as listed)	0.720 kg
Estimated volume (as listed)	13.936 cdm (cubic decimetres)

Typical Use

In the youngest classes the cubes are simply stacked into towers, walls and bridges, which builds spatial sense and cooperation. In primary maths they become counters for addition and subtraction, tallies for bar-graph activities sorted by colour, and units for measuring length ("the book is nine cubes long"). Older pupils can build solid shapes and count the cubes to reach an intuitive idea of volume, or arrange single layers to explore area and perimeter. Four colours make it easy to set repeating patterns and simple probability games.

Keep the set in a tray or box and count it back at the end of each lesson so it stays complete. For teachers assembling a junior lab kit for primary school, 100 cubes are enough for a small group to work together; larger classes usually order one set per group.

Manufacturer

These counting cubes are produced by Jain Scientific Equipments Private Limited of Ambala, Haryana, a company better known by its trading name ScienceLab. It makes classroom teaching aids alongside laboratory apparatus for schools, colleges and education projects. See the company profile for more about ScienceLab.
