Description :

Scissors, All Purpose, Sharp, 180mm (Product Code: SLE/CS/029) are general cuttingscissors with a total length of 180mm, stainless steel blades and a sturdy plastic handle sized foradult hands. Teachers, lab assistants and older students use them for preparing worksheets, cardcut-outs, labels, string, tape and filter paper in classrooms and school laboratories. The scissorsare manufactured by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, a source of educational laboratory equipment in India for schools and colleges.

Specifications

Parameter	Detail
Type	All-purpose scissors
Total length	180mm
Blades	Stainless steel, sharp/blunt (as listed)
Blade fixing	Riveted with a screw in stainless steel or rust-proof metal securing the two blades
Handle	Sturdy plastic for a good grip, sized for adult use

Typical Use

A 180mm pair is long enough to make straight cuts across a sheet of paper in a few strokes, which is why it is a staff-room and preparation-room standard. In the science lab it trims filter paper to fit a funnel, cuts chromatography strips, snips thread for pendulum experiments and opens packets of consumables. In the classroom it handles card, ribbon, tape and laminated charts for displays and teaching aids.

Keep the blades clean by wiping off adhesive residue after cutting tape, and dry the scissors after any contact with water or solutions. Store them closed in a drawer or tool tray rather than loose on benches. Many schools keep one pair per bench as part of their lab equipment accessories so that students do not have to share tools across groups.

Manufacturer

ScienceLab is how Jain Scientific Equipments Private Limited, Ambala, Haryana, presents its range of school and laboratory products. Hand tools such as these scissors sit in its Classroom Student line, next to slates, stationery and teaching aids for education departments and schools. The ScienceLab profile explains more about the company.

Related Classroom Student Items
