Product Name :

Slate, Fibre Board, Double-sided, A4

Product Code :

SLE/CS/031

Description :

Slate, Fibre Board, Double-sided, A4 (Product Code: SLE/CS/031) is an individual writingboard for students, cut from hard black fibre board to A4 size (210 x 297mm) and finished with blackboard paint on both faces and all four edges. Pupils write on it with white slate pencils or chalk, wipe it clean and start again, which makes it a low-cost, reusable aid for practising letters, numbers and quick answers in class. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, a school laboratory equipment manufacturer that also produces everyday classroom aids.

Specifications

Parameter	Detail
Type	Slate, individual writing board for students
Board material	Hard fibre board, density greater than 850kg/m3, black
Size	A4 (210 x 297mm)
Thickness	3mm (+0.5mm/-0.00)
Corners	Rounded
Surface finish	Black special blackboard paint on both sides and all four edges; UV-dried (described as environmentally friendly)
Writing tools	Surface granularity suitable for white slate pencils and chalk
Cleaning	Surface withstands water for wet cleaning
Estimated weight (as listed)	4.000 kg
Estimated volume (as listed)	4.774 cdm (cubic decimetres)

Typical Use

Slates are ideal for "show me" teaching: the teacher asks a question, every pupil writes an answer, and all boards are held up together so the teacher can check the whole class in seconds. They are equally useful for handwriting practice, spelling drills, mental arithmetic, sketching a quick diagram in science, or working out rough calculations before copying the final answer into a notebook. Because both faces are painted, one side can hold a model example while the other is used for practice.

Wipe the board with a dry cloth or duster after each task; for a deeper clean, use a damp cloth and let the slate dry before writing again, since chalk does not mark well on a wet surface. Store slates flat or upright in a rack so the edges are not chipped. Schools listing lab equipments for school and classroom aids in one purchase often order slates together with chalk and dusters.
