Bowl	Stainless steel, 180ml
Requirements (as listed)	Functional environment with theatre, sterilisation and resuscitation rooms, and trained personnel
Product code	SLE/MD/06
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is a Curettage Instrument Set Used For?

The curettage set groups the instruments used for uterine curettage in a theatre setting. The speculum and the Doyen and Auvard retractors give access to the cervix, the Museux forceps hold it, the Martin sound gauges the uterus, the Hegar dilators open the cervical canal in steps, and the Sims curettes and Simon scoop are used for the curettage itself, with the Cheron forceps and stainless steel bowl used for swabbing and collection.

According to the set's description, Museux forceps are used in preference to Pozzi forceps because they are less traumatic, and the vaginal retractors permit better access to the cervix than a speculum. The set is intended only for facilities with theatre, sterilisation and resuscitation room ility befor
