Description :

AWD, Periphery Kit, Renewable (Product Code: SLE/MD/010) is a consumables kit used to restock periphery-level health facilities responding to acute watery diarrhoea (AWD) with IV, feeding, catheter, dressing, glove, sampling and hygiene supplies. Health programmes andNGOs order it as a replenishment module because almost every listed item is sterile single-use or disposable, from IV cannulas in four gauges to Cary-Blair swabs and body bags. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India.

Key Details

Parameter	Detail
IV access and infusion	IV short cannulas 16G, 18G, 22G and 24G, sterile, disposable; scalpvein needles 25G and 21G, sterile, disposable; infusion giving set,sterile, single use; three-way valves, Luer, with caps

Body bags	Body bag, infection control, adult; body bag, infection control, child
Product code	SLE/MD/010
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the AWD Periphery Kit Used For?

The word Renewable in the name reflects what the kit holds: consumables that are used up during patient care and then re-ordered, rather than durable equipment. A periphery facility managing acute watery diarrhoea cases draws on it for intravenous access and fluid giving, nasogastric feeding and aspiration, urinary catheterisation, wound and cannula dressings, and stool
