Product Name :

Flashlight Pre-focused

Product Code :

SLE/MDE/09

Email : sales@scilabexport.com
Phone: +91-7082934803

Description :

Flashlight Pre-focused (Product Code: SLE/MDE/09) is a compact, pre-focused torch used to give additional light during diagnostic examinations, such as looking into the mouth and throat or observing the pupils, in clinics, wards and outreach health work. It is under 185 mm long and under 40 mm in diameter, with a mechanical switch and an o-ring-sealed plastic or metal housing. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India, a lab equipment exporter to health programmes and institutions.

Specifications

Parameter	Detail
Type	Pre-focused flashlight for diagnostic examinations
Length	Under 185 mm
Diameter	Under 40 mm
Housing	Plastic or metal, sealed with o-ring
Switch	Mechanical
Batteries	AA or AAA; supplied without batteries
Battery life	At least 3 hours
Care	Clean and disinfect after each use
Product code	SLE/MDE/09
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is a Pre-focused Flashlight Used For?

A pre-focused flashlight has its optics set at the factory to throw a concentrated beam, so the examiner gets a small, bright spot of light exactly where it is needed without adjusting anything. Clinicians use it to light the mouth and throat while holding the tongue down, to inspect skin and wounds, and to check how the pupils respond to light.

Its slim, sealed body fits a coat pocket or a community health worker's kit. Clean and disinfect it after each patient, as the item's safety instructions specify, and keep spare AA or AAA cells to hand since batteries are not included.

What to Specify When Ordering

- Battery size: AA or AAA
- Housing preference: plastic or metal
- Quantity per clinic, ward or outreach kit
