Intended setting	Operating theatre or emergency room, where exposure to blood, body fluids and other potentially infectious materials may occur
Product code	SLE/MR/012
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is a Woven Surgical Gown Used For?

The woven surgical gown is put on over scrubs by surgeons, scrub nurses and emergency staff before procedures in which blood or body fluids may be encountered. Its covering back panel wraps across the back and ties at the side, so the wearer's back is covered as well as the front, and the jersey cuffs keep the sleeve ends snug at the wrist, where surgical gloves are pulled over them.

Because it is reusable, the gown is disinfected in a chlorine solution, washed and autoclaved in a steam
cover ow
wear.
