Description :

Gloves, W/o Powder, Nitrile, L, Disposable (Product Code: SLE/CPG/01) are powder-freenitrile examination gloves in size large, used to protect hands from chemicals and micro-organisms in hospital and laboratory services. They fit either hand, are non-sterile and single-use,and have a fingertip thickness of at least 120 µm, packed 100 gloves to a box. They are suppliedby **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India, for buyers looking for lab gloves in nitrile in India.

Specifications

Parameter	Detail
Material	Nitrile
Powder	Powder-free
Shape	Fits either hand
Thickness at fingertips	? 120 µm
Size	Large (8.5 to 9.5)
Sterility	Non-sterile
Use	Single-use, disposable
Pack	Box of 100 gloves
Intended use	Examination gloves giving protection from chemicals and micro-organisms in hospital and laboratory services
Product code	SLE/CPG/01
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Are Large Nitrile Gloves Used For?

These gloves cover the wide middle ground of hospital and laboratory work: patient examinations, specimen collection, handling reagents and stains at the bench, cleaning up small spills and working with cultures in a teaching lab. Nitrile is a synthetic rubber, so it is a common choice where staff are sensitive to natural latex, and the powder-free finish avoids powder residue on samples, slides and instruments.

The large size (8.5 to 9.5) suits wearers with broader hands; a glove that is too tight tears easily, while one that is too loose catches on glassware. Because the gloves are non-sterile, they are meant for examination and general handling rather than sterile procedures. Change them between patients or tasks, and replace them straight away after a chemical splash, checking compatibility charts for any solvent used for long periods.

What to Specify When Ordering
