Hand fit	Either hand (ambidextrous)
Fingertip thickness	At least 120 µm
Sterility	Non-sterile
Use	Single-use disposable
Box content	100 gloves
Product code	SLE/CPG/02
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Are Medium Nitrile Gloves Used For?

Medium nitrile gloves are the everyday choice for many lab assistants, nurses, technicians and senior students. They are worn while collecting and labelling samples, preparing slides, pipetting, weighing and cleaning benches, and during basic patient checks. The powder-free surface keeps powder off slides, cuvettes and cultures, and nitrile, being a synthetic rubber, avoids the natural latex that some wearers react to.

Glove sizes such as 7 to 8 follow the usual numbering based on hand measurement, so it is worth trying a pair before ordering for a whole department. A correct fit keeps fingertips sensitive for fine work such as handling cover slips. Since the gloves are non-sterile and single-use, put on a fresh pair for each task and discard used gloves in the proper waste bin.

What to Specify When Ordering

- Number of boxes of 100 medium gloves
- Any large-size boxes needed for staff with bigger hands
- Confirmation that non-sterile gloves suit your tasks
- Delivery location and timing
