Description :

Gloves, Examination, Latex, Powder-Free, Large (Product Code: SLE/CPG/05) are non-sterile, single-use natural latex examination gloves in size large, used during medical examinations and procedures to protect both patient and staff from cross-contamination. They are ambidextrous, powder-free, about 230 mm long and about 110 mm across the palm, which suits wearers with broader hands. They are manufactured by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India, as part of the disposable lab equipment it offers in India.

Specifications

Parameter	Detail
Type	Examination glove (also called protective glove)
Shape	Ambidextrous: fits either hand
Material	Natural latex
Finish	Powder-free
Size	Large
Total length	Approximately 230 mm
Palm width	Approximately 110 ± 10 mm
Sterility	Non-sterile
Use	Strictly single use
Estimated weight (as listed)	0.700 kg
Estimated volume (as listed)	2 dm^3
Product code	SLE/CPG/05
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Are Large Latex Examination Gloves Used For?

Large latex examination gloves are the routine barrier for physical examinations, wound checks, sample collection, bedside care and cleaning of equipment in clinics, wards and health centres. Natural latex is valued for its stretch and fingertip feel, so a well-fitting glove lets the wearer handle small items such as swabs and vials without fumbling. The large size, about 110 mm across the palm, is intended for wearers whose hands feel cramped in a medium glove.

These gloves are non-sterile, so they are chosen for examinations rather than surgery. Put on a new pair for each patient, remove gloves by turning them inside out, and wash hands after taking them off. Because some people react to natural latex, keep a nitrile option on hand for latex-sensitive staff or patients.

What to Specify When Ordering
