Powder	Powder-free
Shape	Ambidextrous (fits either hand)
Sterility	Non-sterile
Use	Single use only
Estimated weight / volume (as listed)	0.700 kg / 2 dm^3
Product code	SLE/CPG/06
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Are Medium Latex Examination Gloves Used For?

Medium latex examination gloves, also called protective gloves, are worn in outpatient rooms, wards, first-aid posts, diagnostic labs and nursing skills labs for tasks such as taking temperatures and blood pressure, dressing checks, handling specimens and cleaning instruments. A snug latex glove moves with the hand, so fine tasks such as opening sample tubes or handling syringes stay precise.

In nursing and medical training, the medium size is handy for teaching glove technique: putting gloves on without touching the outer surface, changing them between patients and peeling them off inside out. Because the gloves are strictly single use and non-sterile, they are for examinations, not for surgery, and should be discarded after each patient or task.

What to Specify When Ordering

- Number of medium gloves, in enough quantity that staff never need to reuse a pair
