Description :

Gloves, Examination, Latex, Powder-Free, Small (Product Code: SLE/CPG/07) are small-size natural latex examination gloves, worn once to protect patient and wearer from cross-contamination during examinations, first aid and specimen handling. Their narrow palm, about 80 mm across, gives a close fit for slimmer hands and many students, while the 230 mm length covers the wrist. They are non-sterile, powder-free and fit either hand, and are supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, a lab consumables supplier in India.

Use	Strictly single use
Estimated weight / volume (as listed)	0.700 kg / 2 dm³
Product code	SLE/CPG/07
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Are Small Latex Examination Gloves Used For?

Small examination gloves matter more than many buyers expect: a glove that is too big bunches at the fingertips, slips on smooth glassware and makes fine tasks clumsy. This size is intended for staff with slimmer hands and for students in nursing labs, first-aid training and school biology practicals, where it makes a practical addition to school biology lab equipment in India for dissections, specimen handling and slide preparation.

The gloves are single use and non-sterile, so hand a fresh pair to each student for each session and collect used gloves for proper disposal. Show learners how to remove gloves inside out so the outer surface never touches the skin. As the gloves are natural latex, ask about latex allergies before a class and keep a latex-free option available.

What to Specify When Ordering

- Number of small gloves, enough for a fresh pair per student or patient
