Description :

Tube, ASP/Feed, L125cm, Sterile, Disposable (Product Code: SLE/CPG/017) is a long single-use PVC tube used to aspirate liquids or gases from the stomach and small intestine, or to give feeds, in surgical, paediatric and intensive-care wards. The CH12 tube is about 125 cm long, with a conical cup connector, four side windows and depth marks at 40, 50, 60 and 70 cm. It is manufactured by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India, for hospital orders and laboratory equipment tenders in India.

Specifications

Parameter	Detail
Type	Sterile enteral feeding / aspirating catheter, single channel
Diameter	CH12 (Charrière / French gauge)
Length	Approximately 125 cm
Markings	At 40, 50, 60 and 70 cm from the distal end (cardia, stomach, duodenum, jejunum)
Proximal end	Cup connector with conical tip, for catheter-tip feeding syringes or a suction pump system
Distal end	Open, with four side windows
Material	Polyvinyl chloride (PVC)
Size identification	Colour code / external diameter visible on the cup connector
Sterility	Sterile; initial sterilisation by ethylene oxide gas
Use	Single-use, disposable
Estimated weight	0.022 kg
Estimated volume	0.232 dm³
Product code	SLE/CPG/017
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Aspiration/Feeding Tube Used For?

This tube serves two purposes. Connected to a suction pump system, it aspirates liquids and gases from the stomach, duodenum and small intestine; connected to a catheter-tip (conical) feeding syringe, it is used to feed a child. The conical cup connector accepts both.

The four marks at 40, 50, 60 and 70 cm from the tip correspond to the cardia, stomach, duodenum and jejunum, giving staff a reference for how far the tube has been advanced. At about 125 cm, it is much longer than a standard gastric feeding tube, so wards usually stock it as a separate line. Lab equipment distributors in India supplying surgical wards can quote CH12, the size li
