Description :

Syringe, Feeding, 50ml, Luer Tip, sterile (Product Code: SLE/CPG/018) is a single-use, three-piece syringe used to give enteral feeds through Luer-connector feeding tubes and for manual aspiration, mainly in neonatal, paediatric and nutrition units. Available in 50 ml or 60 ml capacity,it has a clear, permanently graduated barrel, a centric or eccentric Luer tip and a plungerbackstop. It is manufactured by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala,India, and supplied to hospitals and buyers sourcing disposable lab equipment in India.

Specifications

Parameter	Detail
Type	Feeding syringe, Luer tip, 3-piece (barrel, plunger and gasket)
Capacity	50 ml or 60 ml
Tip	Luer tip, centric or eccentric
Barrel	Clear, with precise graduation in ml; permanent marking, easy to read
Plunger	Safe plunger backstop
Compatibility	Feeding tubes with Luer tips
Sterility	Sterile; initial sterilisation by ethylene oxide gas or gamma radiation
Use	Single-use, disposable
Estimated weight	0.040 kg
Estimated volume	0.20 dm^3
Features	Clear graduations and piston seal
Product code	SLE/CPG/018
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Luer Tip Feeding Syringe Used For?

This syringe is used for gastroenteral feeding, for drawing liquid or gas out of the stomach by hand, and for manual pharyngeal or tracheal aspiration. Its Luer tip fits feeding tubes with Luer tips, which the listing describes for feeding premature babies, newborns and malnourished infants.

The clear barrel with permanent millilitre graduations lets staff read each feed volume easily, and the plunger backstop helps prevent the plunger from being pulled out of the barrel. Nutrition centres that order through one lab consumables supplier in India can pair it with the matching Luer feeding tube so that every connection on the ward is the same type.

What to Specify When Ordering

- Capacity: 50 ml or 60 ml
