Description :

Bandage, Gauze, 8cmx4m, Roll (Product Code: SLE/DDS/04) is a non-elastic, non-adhesive cotton gauze bandage used to hold wound dressings and IV placement dressings in hospitals, clinics and first-aid rooms. Nurses and first-aid staff use it as a light, absorbent roll of 100% cotton gauze about 7.5–8 cm wide and 4–5 m long, with selvedge edges, supplied non-sterile for single use. It is manufactured by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India.

Specifications

Parameter	Detail
Type	Gauze bandage roll with selvedge; non-elastic, non-adhesive

Weight	Approx. 27.5 g/m²
Thread count	Warp 12 threads/cm; weft 8 threads/cm
X-ray	Non-detectable by X-ray
Sterility	Non-sterile
Use	Single use
Dimensions	8 cm × 4 m, roll
Product code	SLE/DDS/04
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Gauze Bandage Used For?

A gauze bandage is wound over a compress or dressing pad to keep it in place on a wound, or around an IV placement site to secure the dressing there. Because this roll has no elastic and no adhesive, it holds the dressing without squeezing the limb and without sticking to skin or hair.

The original product description notes that this width and length were chosen as the size most commonly used, which makes it a practical stock item for wards, health posts and a school or lab first aid box. As the roll is non-sterile, place a sterile compress against an open wound first and use the bandage only as the outer retaining layer, then secure the free end with medical tape.

Manufacturer

Jain Scientific Equipments Private Limited, which trades under the name ScienceLab, manufactures this gauze bandage in Ambala, Haryana, India. The company manufactures it for hospitals, clinics, school and lab first-aid rooms, distributors and aid programmes in India and international markets, alongside the other dressings in its medical consumables range.
