Product Name :

Clamp, Umbilical Cord, Sterile

Product Code :

SLE/DDS/09

Email : sales@scilabexport.com
Phone: +91-7082934803

Description :

Clamp, Umbilical Cord, Sterile (Product Code: SLE/DDS/09) is a disposable, sterile plastic clamp used to clamp a newborn's umbilical cord soon after birth in delivery rooms, maternity wards and health centres. Midwives and delivery teams use one clamp per baby; its security lock clicks to show it is correctly closed and protects against accidental re-opening, while grooves along its length stop the cord from slipping. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India.

Key Details

Parameter	Detail
Type	Disposable umbilical cord clamp
Material	Plastic (polymer)
Sterility	Sterile
Use	Single use
Locking	Security lock with a click to indicate correct locking; protects against accidental re-opening after clamping
Cord grip	Grooves along the whole length prevent the cord from slipping and keepit in position
Handling	Finger grip for safe, easy handling
Intended use	Clamping the umbilical cord soon after birth
Product code	SLE/DDS/09
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Umbilical Cord Clamp Used For?

After a baby is born, the umbilical cord is clamped before it is cut, and the clamp stays on the baby's side of the cord afterwards. A plastic clamp with a positive lock is quicker to apply than a tied ligature and gives the midwife a clear signal – the click – that it has closed properly.

To apply it, hold the clamp by its finger grip, place the open jaws across the cord and press them together until the lock clicks; if there is no click, reposition and close it again. The clamp is supplied sterile, so check that each pack is intact before opening. Maternity units that restock from one lab consumables supplier in India often order the clamps together with umbilical tape, newborn identification bracelets and dressings.

Supplier
