Description :

Cotton Wool, 500g, Roll, Non-Sterile (Product Code: SLE/DDS/013) is a highly absorbent roll of surgical-grade cotton wool used for dressings and for skin disinfection before injections in hospitals, clinics and first-aid rooms. The 500 g net roll is 100% cotton that has been purified, bleached and carded; it is not pre-cut, so staff tear off only what they need. It is supplied non-sterile by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India.

Specifications

Parameter	Detail
Presentation	Roll, not pre-cut
Net weight	500 g
Material	100% cotton, surgical grade; purified, bleached and carded
Absorbency	Water absorbent; high-absorbency surgical grade cotton wool
Sterility	Non-sterile
Use	Single use
Product code	SLE/DDS/013
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Cotton Wool Roll Used For?

Cotton wool is the everyday absorbent of a treatment room. Small pads torn from the roll are moistened with the facility's skin disinfectant to wipe an injection site, used to clean around a wound, or placed as a soft absorbent layer within a dressing. Purifying and bleaching remove the natural waxes of raw cotton, which is what lets surgical cotton wool take up water readily.

Tear pieces from the roll with clean hands and keep the rest closed in its wrapping, away from dust and moisture, because the roll is non-sterile. Where a sterile layer is needed directly on a wound, use a sterile gauze compress instead. A 500 g roll is a practical size for refilling a first aid box in a lab, school or workshop as well as for ward use.

Supplier

Jain Scientific Equipments Private Limited, which does business as ScienceLab from Ambala, Haryana, India, supplies this cotton wool roll to hospitals, clinics, schools, laboratories and distributors in India and international markets. It is a sourced item within the company's dressing and first-aid range. The ScienceLab profile page gives more background on the company.
