Description :

Syringe, Disposable, 20ml, Sterile (Product Code: SLE/HLI/02) is a sterile, disposable 20 ml syringe with a Luer nozzle, used to inject fluids into, or withdraw fluids from, the body in hospitals, clinics and treatment rooms. Its 20 ml capacity suits larger-volume tasks such as drawing up and diluting medicines or aspirating fluid, and it comes in two-piece or three-piece construction. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India.

Specifications

Parameter	Detail
Type	Disposable syringe, sterile
Capacity	20 ml
Nozzle	Luer
Construction	Two-piece (barrel with Luer nozzle, piston/plunger) or three-piece (barrel with Luer nozzle, stopper, piston/plunger)
Intended use	To inject fluids into, or withdraw fluids from, the body
Needle	Not specified in the listing; sterile needles are listed separately
Product code	SLE/HLI/02
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the 20 ml Syringe Used For?

A 20 ml syringe handles volumes that are too large for everyday injection syringes: drawing up and mixing medicines for dilution, withdrawing fluid, or flushing and irrigating. The Luer nozzle takes standard Luer-fitting needles and connects to many tubing adaptors, so one syringe size covers several ward tasks.

The three-piece version has a separate stopper on the plunger tip, which many users find gives a smoother, more controlled push; in the two-piece version the plunger seals directly against the barrel. Laboratories also buy 20 ml syringes as disposable lab equipment in India for measuring and transferring liquid samples.

What to Specify When Ordering

- Construction: two-piece or three-piece
- Number of 20 ml syringes
- Needles required, with gauge (ordered separately)
- Delivery destination

Supplier

Jain Scientific Equipments Private Limited, the company behind the ScienceLab brand in Ambala, Haryana, India, supplies this 20 ml syringe to hospitals, clinics, laboratories and distributors in India
