Description :

ID Bracelet, Child, Red (Product Code: SLE/AE/04) is a single-use, tamper-proof identification band used to label children with their personal details in paediatric wards, feeding centres, vaccination sites and field surveys. The red, transparent, non-stretch band is written on with an ordinary ballpoint pen and sealed with a clip that cannot be reopened once clicked shut. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India, a lab consumables supplier to institutions and health programmes.

Specifications

Parameter	Detail
Type	Personal identification bracelet for paediatric use; single use, tamper proof, transparent, non-stretch
Colour	Red
Band material	Supple non-stretch plastic, LDPE-based, vinyl or equivalent
Resistance	Water, common solvents and soaps
Feel	Strong and durable, soft to the touch; atraumatic and hypo-allergenic
Closure	Strong single-use clip that cannot be removed once clicked into position
Writing	Details written directly on the band with a common ballpoint pen (non-erasable), or on a paper strip inserted inside the transparent band
Identification paper	When applicable: writable with a ballpoint pen and easy to insert into the band
Dimensions	Approximately 1 cm x 25 cm (w x l)
Length adjustment	Adjustable at the closure; the free end can be trimmed next to the clip
Product code	SLE/AE/04
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Red Child ID Bracelet Used For?

At admission or registration, staff write the child's name, number and date on the band, or on the paper insert, and let the ink dry. The band is wrapped around the wrist with enough room for a finger underneath, the clip is pressed until it locks, and the surplus tail is cut off close to the clip so it cannot catch. Because the plastic will not stretch and the clip cannot be reopened, the band has to be cut to be removed, which makes any tampering obvious.

Many centres use colour to separate groups of children at a glance, for example by ward, programme or follow-up category; the red band can mark one such group while the blue version marks another. Facilities that buy through a laboratory equipment supplier in India usually order these in quantity with other single-use items, so stock does not run short on busy intake days.
