Description :

Fitted at admission or registration, this red identification band stays on a child's wrist until it is cut off. The transparent, non-stretch plastic takes details written with a ballpoint pen, or a paper strip slipped inside, and its clip locks once and cannot be reopened. Centres often use red to mark one group of children and blue for another.

Red child ID band specifications

Parameter	Detail
Type	Personal identification bracelet for paediatric use; single use, tamper proof, transparent, non-stretch

Fitting and checking the red ID band

Fitting at intake. Write the child's name, number and date, let the ink dry, then wrap the band round the wrist, leaving a little slack. Press the clip until it locks and cut the spare tail close to the clip. The child then moves on to the MUAC tape and the spring-type infant scale.

Checking at each contact. Before a weight from the Electronic Scale Baby or any other measurement goes into the register, staff read the band aloud and match it with the register entry. A band that has slipped or faded is replaced on the spot.

Removal at discharge. When the child leaves the ward or programme, cut the band with
into t
