Description :

Portable Baby/Chd/adult L-H (Product Code: SLE/AE/011) is a folding length-height measuring board used to measure babies lying down and children from 24 months and adults standing, in household surveys, mother-and-child clinics and screening camps. With two extensions it reads 0–204 cm in 0.1 cm divisions, so one board covers every family member. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India, a laboratory equipment exporter from India serving field programmes and clinics.

Specifications

Parameter	Detail
Measures	Recumbent length of babies up to 24 months old (from a minimum length of 8 cm); standing height of children aged 24 months and above and adults
Range with two extensions	0–204 cm
Range with one extension	0–142 cm
Unit and graduation	Centimetres; smallest graduation 0.1 cm
Accuracy / precision	±0.2 cm / ±0.2 cm
Board width	Approximately 25 cm
Measurement scale	Fully integrated, long-lasting and hard-wearing; metal or material of equivalent stretch and tear resistance; numerals oriented parallel to the board; easy to read in low light
Head/foot piece	Large piece giving a stable base for vertical set-up and acting as headboard for horizontal set-up
Measuring slide/wedge	Glides smoothly; lockable or with friction feature; wobble of about 0.2 cm maximum over full length; reading points marked with pictogram or arrow
Folding and transport	Fold-up, low weight and compact; panels secured with self-contained spring-loaded bolts; parts do not loosen or shake in transit
Carrying	Integrated handle at the point of balance and/or removable shoulder/back strap(s); strap fixings do not stop the board lying flat
Set-up	Simple and fast, no tools required; no calibration needed as all parts have fixed positions
Construction	Firm flat surface; light, strong, durable material; no sharp edges or corners; smooth finish for easy cleaning; resistant to high humidity and heat; water splash proof and shock resistant; designed for heavy-duty use
