Description :

Dissecting Kit (Economy) (Product Code: SLE/EDE/04) is an entry-level set of 18 instruments packed in a plastic box. It brings together scissors, forceps, scalpels, needles, a razor and a few glass accessories, so one student can carry out a basic dissection and prepare a temporary mount from a single box. As a budget-friendly dissection kit for school labs in India, it is assembled by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala.

Specifications

Parameter	Detail
Product type	Dissecting kit, economy version
Number of instruments	18
Packing	Plastic box
Scissors	1 sharp; 1 sharp-blunt, 125 mm
Needles	1 straight needle with plastic handle; 2 straight needles (steel); 1 arrow-head needle

Full contents of the box:

- 1 Scissor, sharp
- 1 Scissor, sharp-blunt, 125 mm
- 1 Section lifter
- 1 Magnifier
- 1 Plain slide
- 1 Cover glass
- 1 Forceps, blunt
- 1 Forceps, sharp
- 2 Scalpels
- 1 Straight needle with plastic handle
- 1 Chain hook (small)
- 1 Razor
- 1 Watch glass
- 1 Blow pipe
- 2 Straight needles (steel)
- 1 Needle, arrow head

Typical Use

In a zoology practical, the scissors and scalpels open the specimen, the blunt and sharp forceps hold and lift tissue, the small chain hook keeps flaps drawn aside, and the needles tease out structures for the student to identify under the magnifier. The blow pipe can be used to gently inflate tubular organs so their path is easier to follow.

The same box also supports plant anatomy work: the razor cuts thin hand sections of stems or roots, the watch glass holds water or stain while sections are sorted, and the section lifter transfers a chosen section onto the plain slide under the cover glass. That mix of cutting tools and glass up to junior befor
