Skin suitability	Specified for all skin types, including dry and sensitive skin; not to cause skin irritation
Physical properties	Firm bar of uniform texture and colour; good lathering and cleansing
Shelf life	Depends on the batch and storage conditions; ask us for the expiry date of the batch you are quoted
Product code	SLE/SAH/02
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Toilet Soap Bar Used For?

Handwashing with soap and water is one of the simplest hygiene habits taught in schools and promoted in water, sanitation and hygiene (WASH) programmes, and a bar soap is the everyday tool for it. This wrapped bar is meant for washing hands and for bathing; its perfume-free formula and moisturizing ingredients make it a practical choice for large groups where users have different skin types.

Total fatty matter is the main measure of a toilet soap's quality: a higher TFM generally means a harder bar that lathers well and lasts longer in daily use. Keep bars in a drained soap box between uses so they do not soften, and store cartons in a cool, dry place away from direct sun.
