Description :

Latrine Superstructure Double Cubicle (Product Code: SLE/SAH/17) is a latrine cabin kit used to build a block of two latrine stances over standard 120 cm x 80 cm squatting plates in emergency and communal sanitation. It forms a double superstructure with a lockable door for each cabin, a roof/cover and natural ventilation, and is intended for deployment with installations such as trench latrines. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India, which also handles school lab equipment bulk supply for institutions.

Specifications

Parameter	Detail
Compatible plates	Standard squatting plates of 120 cm x 80 cm
Cabins	Two (double cubicle, a block of two latrine stances)
Components	Double superstructure with lockable doors, roof/cover and natural ventilation/aeration
Deployment	Complete latrine cabin kit, for example with trench latrineinstallations
Assembly	Easy to assemble into a stable and durable installation in emergencies
Typical settings	Communal latrines, health centres, feeding centres, schools
Product code	SLE/SAH/17
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Double-Cubicle Latrine Superstructure Used For?

Communal sites such as camps, schools, health centres and feeding centres usually need latrines built in groups rather than one by one. This kit encloses two stances in a single block, so teams erect fewer separate structures while every user still gets a private cubicle with its own lockable door. A two-cabin block also makes it easy to allocate cubicles to different user groups where a site plan calls for that.

On a trench latrine, set the block over two 120 x 80 cm plates placed side by side on firm ground, then assemble walls, doors and roof following the kit layout. Keep the ventilation openings clear, check both door locks after assembly, and plan a handwashing point close to the block so users can wash their hands on the way out.

What to Specify When Ordering

- Number of double blocks — each block covers two stances.
- Whether two squatting plates of 120 cm x 80 cm per block are needed as well.
- Any single-cubicle kits for an odd number of stances.
- Whether accessibility add-on kits are needed for selected cubicles.
