Description :

Human Histology Slide Set of 25 (Product Code: SLE/PS/79) is a collection of 25 glass microscope slides of human tissues used to teach histology in college, allied health and senior school biology courses. It gives a varied cross-section of the body, from the cerebellum andspinal cord to the digestive tract, kidney and reproductive organs. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, among its prepared microscope slides in India.

Specifications

Parameter	Detail
Number of slides	25
Slide type	Glass microscope slides
Coverage	A varied cross-section of human histology
Preparations	Sections; nerve in TS and LS, artery and vein in TS, scalp in VS
Product code	SLE/PS/79
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

Slides in the set, grouped by body system:

- **Nervous system:** Cerebellum, section; Spinal cord, section; Nerve, TS and LS.
- **Circulation and lymphatic:** Artery and vein, TS; Cardiac muscle, section; Lymph node, section; Spleen, section.
- **Skin:** Scalp, VS; Skin, heavily pigmented section.
- **Muscle:** Striated muscle, section.
- **Digestive system:** Oesophagus; Stomach, fundic portion; Duodenum; Ileum; Appendix; Colon; Liver; Pancreas (all sections).
- **Endocrine and urinary:** Thyroid gland, section; Kidney, section.
- **Reproductive:** Testis; Ovary; Uterus; Cervix; Mammary gland (all sections).

What Is a Human Histology Slide Set Used For?

The set lets students work system by system through human tissue types: nervous tissue in the cerebellum, spinal cord and nerve; the layered walls of artery and vein; the digestive tract from oesophagus to colon; and glandular organs such as the liver, pancreas and thyroid. Comparing striated muscle with cardiac muscle is a classic practical exercise that the set supports directly.

Scalp and heavily pigmented skin sections show the epidermis, hair follicles and pigment, while the testis, ovary, uterus, cervix and mammary gland slides support reproduction lessons. Locate each tissue layer at low power, switch to higher magnification to identify cell types, and record observations as labelled drawings.

Supplier

ScienceLab is the trading name of Jain Scientific Equipments Private Limited, Ambala, Haryana, India. The company supplies this human histology collection for teaching use to schools, colleg ets, and c the Scien
