Product Name :

Microslide Animal Tissue Set 2 Muscle, Bone, Connective

Product Code :

SLE/PS/81

Description :

Microslide Animal Tissue Set 2 Muscle, Bone, Connective (Product Code: SLE/PS/81) is a Microslide of 8 related 35mm images, photographed through a microscope, used to teachmuscle, bone and connective tissue in school biology lessons. Students compare voluntary,involuntary and heart muscle alongside areolar tissue, bone, blood, fat and spinal cord, witharrows and callouts marking each key feature. This biology teaching aid is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India.

Specifications

Parameter	Detail
Format	Microslide: 8 related 35mm images photographed through a microscope
Viewed with	Microslide Viewer
Muscle images	Voluntary muscle cells, involuntary muscle cells, heart muscle
Connective and supporting tissue images	Areolar connective tissue, bone, blood, adipose tissue
Nervous tissue image	Spinal cord
Labelling	Arrows and callouts on the images
Accompanying material	Detailed text folder with a pocket for storing the Microslide
Product code	SLE/PS/81
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Microslide Animal Tissue Set Used For?

The three muscle images set up the classic comparison in any tissue topic: long striated voluntary fibres, spindle-shaped involuntary cells and the branched fibres of heart muscle. Connective tissue then appears in four very different forms, from loose areolar tissue and fat-storing adipose tissue to the hard matrix of bone and the fluid tissue of blood. The spinal cord image rounds off the set with nervous tissue.

Because every image already carries arrows and callouts, teachers use this Microslide for a short briefing before students examine their own tissue slides, or for revision where microscope time is limited. The questions in the text folder work as a ready worksheet, which makes the set a practical biology teaching aid for large classes.
