Description :

The **Dissecting Instruments Set** (Product Code: SLE/EDE/20) brings together 14 stainless steel dissecting instruments in a canvas case, so a student or teacher has a complete, organisedtoolkit for practical work instead of loose items gathered from a drawer. It suits institutions lookingfor a dissection kit for school use in India as well as college zoology and botany departments, andit is manufactured as biology lab equipment in India by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala.

Specifications

Parameter	Detail
Number of instruments	14
Instrument material	Stainless steel
Case	Canvas
Suitable for	Student and teacher dissection practicals

Typical Use

A cased set works best when it is issued as a unit: one set per student or per pair, signed out at the start of the practical and checked back in at the end. Counting the instruments back into the case against the stated total of 14 makes a missing tool easy to spot, and students learn to lay out, use and return instruments in an orderly way — a habit that matters when sharp tools are involved. The same set moves easily between the dissection bench and field or herbarium work.

For a biology lab setup in a school in India, departments often keep a class quantity of identical sets so that every group works with the same tools and the teacher can demonstrate each step once. After use, wash and dry every instrument fully before it goes back into the canvas case, because moisture trapped in fabric can mark steel over time; store the closed case in a dry cupboard.

Manufacturer

The set comes from Jain Scientific Equipments Private Limited, a company based in Ambala, Haryana, that trades as ScienceLab and makes dissection, biology and general laboratory equipment for education. You can read about our background and facilities on the company profile page.

Related Dissection Equipment

Other sets for comparison, plus the working surface and pins a dissection needs:

- Dissecting Set, Student — an alternative set aimed at individual student use
- Dissecting Set, Large — a larger set option for comparison
- Dissecting Kit (Economy) — a budget kit for large classes
- Dissection Pan, Pad & Cover — an aluminium pan with pin-holding pad to work on
